

ecocanopy™ Ecomist Exhaust Hood

ecocanopy™ ECOMIST

Introduction

The ECOMIST exhaust hood with ecoaircurtain™ technology is a highly efficient kitchen ventilation hood designed specifically to be used over solid fuel cooking appliances such as charcoal grills and wood fired ovens. This hood uses ecomist™ spray-mist technology in conjunction with ecoshield™ baffle filters to mitigate the spreading of embers whilst efficiently filtering smoke and grease.

Solid fuel cooking

Wide angle water mist

How it works

This hood uses a curtain of cold water mist in addition to a row of baffle filters to capture grease and smoke while mitigating any embers from passing through. Water usage is kept to a minimum with the use of highly efficient wide angle misting nozzles. The ecoaircurtain™ ensures all the smoke and grease is contained within the boundaries of the exhaust hood, resulting in outstanding effluent containment.

Specifications

Sizes: L= 1000mm - Unlimited, W=1000 - 1800mm, H=450 - 800mm (*custom heights and tapers also available*)

Material: 1.2mm 304 No.4 S/S

Water consumption: 0.0107 L/s @ 2Bar at nozzle

The ecocanopy™ ECOMIST exhaust hood is a *full stainless steel* fabricated *CodeMark approved* canopy, designed and manufactured in Australia.
