

PREVENT COSTLY REPAIRS, LOST ENERGY, LOST PROFITS AND DOWNTIME

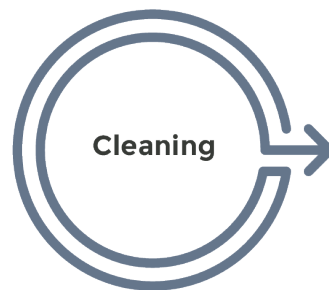

Preventive maintenance for your ecosense system can help your business protect its bottomline. ecocanopy offers comprehensive site visits to evaluate, adjust, and repair your kitchen's installed DCKV equipment. Learn what our 7-step site evaluation offers:

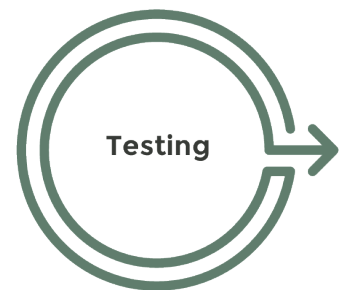

Walk-through to review efficiency, comfort concerns and operation

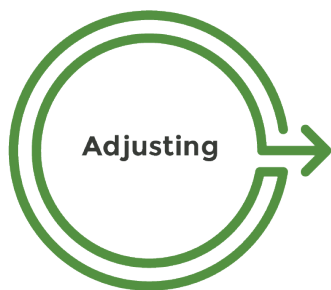

Systematic and thorough inspection of ecosense components

Temperature and optic sensor cleaning, as necessary

Operational testing of ecosense and related systems (i.e. BAS)

Adjustment of settings to maximize desired efficiency and/or comfort

Review work, offer staff training and perform final adjustments

Submission of final commissioning report to customer
