

SIACRA-V

Commercial Kitchen Island V bank Canopy with ecoaircurtain™ technology and return air

Description

The SIACRA-V is specifically designed for **single island and narrow double island cookbank** installations and is the ultimate single island canopy option in our non UV range. Featuring ecoshield™ air curtain technology with makeup air, this canopy is fully featured. Allowing infinite balancing of the exhaust air and supply air, the SIACRA-V canopy is highly efficient at lower exhaust air rates with a single row of exhaust connections in the centre of the hood.

Typical Installation

Ceiling mounted.

Cross Section

Quick Data

SIACRA-V	
Dimensions	L = 1200mm to unlimited
	W = 2100 to 3000
	H = 450, 600 and 800. (Custom heights available on request.)
Section sizes	Up to 3.0m long max – check site access
Lights	36 watt double fluorescent each side & per section
Spigots	Exhaust: max 1 per 1000mm* in the center
	Supply: max 1 per 1000mm* per side
	* denotes specific to each ecocanopy™
Filters	1 per 500mm section per side.
ecoshield™ UV technology	n/a

Construction

Made from 1.2mm #304 stainless steel. ecocanopy™ hoods are fully welded, polished, have no visible fixings and minimal moving parts. All ecocanopy™ hoods are independently approved, comply with Australian Standard 1668.2 -2012 and use the latest in European design. All ecocanopy™ hoods have Codemark approval.

Features

ecoaircurtain™

- Fully adjustable air/supply spigots
- Fully adjustable air face/baffle
- Insulated supply air chamber

Return air/make up air is used to provide air to the return air plenum of the canopy. This air creates a horizontal layer of air which gently blows across the canopy to the exhaust filters. The air curtain directs smoke, grease laden air and odour towards the filters thereby increasing the effectiveness of the canopy at lower exhaust airflow rates. The ecoaircurtain™ reduces exhaust air which means smaller fans and smaller ducts maybe used, resulting in lower capital costs. Reduced exhaust air also means lower energy costs and less noise is achieved.

ecoshield™ UV technology
