The world's first easy access commercial kitchen exhaust canopy

ezyAXS™ brings the canopy to you!

No more standing on hot cooking equipment, using ladders or leaning over fryers to clean or maintain your exhaust canopy. Our patented design allows you to access the filters and exhaust plenum at ground level. The push of a button brings your canopy to life and makes your life much easier.

ezyAXS

HOW IT WORKS

The exhaust plenum of the hood can be electrically lowered and raised using a switch. Once the plenum has been lowered, the filters can be easily and safely removed for cleaning.

The plenum and grease drains can also be emptied and wiped down at this point. After completing the hood maintenance, the plenum can be raised up to its retracted position using the switch. No climbing on cooking equipment or step ladders are required to perform the above routine.

PRODUCT SPECS

- Width: 1000mm - Unlimited
- Depth: 1000mm - 1900mm
- Height: 600mm - 900mm
- Electrically powered drop down plenum
- Made from 1.2mm #304 stainless steel
- ecocanopy™ hoods are fully welded
- Polished and have no visible fixings
- Power Requirements - 10A for plenum, 10A for Lighting

FEATURES & BENEFITS

The patented design of the ezyAXS™ lowers the exhaust plenum for safe and efficient access to the filters and plenum.

This means;

- OH&S risks are dramatically reduced because staff do not need to stand on ladders or greasy equipment to clean the canopy.
- Safe and efficient access means that cleaning and maintenance can be DIY, saving you \$1,000's per annum.
- ezyAXS™ uses ecoaircurtain™ technology to lower exhaust air flow rates and conserve energy.

ecosshield UV systems are compatible with the ezyAXS™ canopy, making this a TOTAL grease, odour and cost reduction solution.

Optional fold down grid shelf with canopy interface means that you can still use a grid shelf with your ezyAXS™ canopy.

TOTALLY CUSTOMISABLE

We understand that your restaurant is different and unique. That's why every ecocanopy is custom made to suit your exact requirements.

Working with you, we help you determine which ecocanopy is right for your kitchen. Whether you use electric, gas or wood fired equipment, we have the perfect solution for you. And as you would expect, every ecocanopy product is designed to make life simpler and easier.
